## SUMMARY

---

Experienced software engineer with over 15 years in the industry. Based in Italy and working remotely, I have successfully delivered complex projects for both major corporations and startups. My expertise includes business analysis, system architecture, and team leadership.

## EXPERIENCE

---

### Senior Frontend Developer

2022 – Present

*Keybiz SRL*

*Italy, Rome, remote*

- Developed a complex web app for the largest telecommunication operator with **Tanstack Query/Form/Router and Typescript**
- Integrated **OpenAPI generators** to create API calls, **YAML data schemas and TypeScript** interface definitions, which reduced backend and frontend integration efforts by 50%
- Created NPM packages of interactive data visualizations (choropleth maps, heatmaps, radar charts, chord diagram, network charts, etc.) with **React and D3.js**.
- Implemented **CI/CD pipelines** with **GitHub Actions, Docker and Azure Devops**
- Built **microfrontends** with NPM: packaged each **microfrontend as an NPM package**, allowing teams to develop, test, and deploy independently.
- Advocated for well-tested and documented, high quality code. Participated in the development of **code guidelines**.

### Software Developer

2021 – 2022

*Nexi Digital*

*Italy, Milano, remote contractor*

- Delivered electronic payments management portal with complex async flows, custom **UI design system** and **PKCE** authentication flow utilizing **Redux-sagas, Axios, SASS** .

### Senior Fullstack Developer

2017 – 2021

*Size4.me SRL*

*Italy, Massa*

- Delivered a web service** helping to choose the right size for online shoppers.
- Selected and implemented the technology stack (**React, Typescript, Next, Redux, DynamoDB, Node**)
- Built out the frontend and backend components including authentication (**Authorization Code Flow** + integration with FB and Google), **RESTful API, material design, NoSQL db**
- Maintained system performance with **Linux, Raven, Amazon Web Services**
- Developed **Webpack** configurations for various build modes( production/development/separate bundles/multiple entry points).
- The web service acquired 45k users** in the first 3 months after launch.

### Senior Software Developer

2013 – 2016

*Polnakorzina*

*Moscow, Russia*

- Developed the admin part and front-office of an affiliate management system using **PHP, MySQL, jQuery**

## TECHNICAL SKILLS

---

**Frameworks:** React, Next.js, Node.js, React-Native, Redux, Redux-Saga, Webpack, Vite, Tanstack Query/Router/Form, MSW, Axios, Zod, PrimeReact, Material-UI, SASS, Styled components, Tailwind

**Languages:** JavaScript, Typescript, HTML/CSS, PHP, SQL

**Developer Tools:** Git, Gitlab, Github, Docker, Amazon Web Services, Oracle, MySQL, Firebase, Dynamo DB, Swagger, Postman, Figma, Adobe Illustrator, Jira

**Libraries:** D3.js

## EDUCATION

---

### Ufa State Aviation Technical University

Ufa, Russia

*Master in Computer Science (Software Engineering), Bachelor in Business Administration*

*diploma with honor*

## LANGUAGES

---

English, Italian, Russian - All professional proficiency
